About Us.

Introduction

IGS provides professional engineering, security, electrical and safety compliance services across London and the South East. We proudly support property and estate management, commercial, educational, and domestic sectors, delivering installation, planned maintenance, repairs and 24/ 7 call-outs with precision and care.

Our Background

Our team combines over 30 years experience in both policing and electrical engineering, creating a unique understanding of safety, reliability and community trust. This rare blend of background gives IGS a deeper insight into how secure environments are built - not just through systems, but through dependable service and attention to detail.

Vision for the Future

Our vision is to be recognised as the first choice for integrated security and electrical solutions across London and the South East - known for professionalism, precision, and people-first approach.

GATE AUTOMATION & SAFETY

At IGS London, safety and reliability are at the heart of everything we do. As fully Gate Safe-accredited installers, we follow industry-leading standards to ensure every powered gate system we install is safe, compliant, and built to last. Our clients rely on us for honest expertise, exceptional workmanship, and a professional approach from the first consultation to final handover.

COMPREHENSIVE GATE AUTOMATION SOLUTIONS

Whether you're upgrading an existing entrance or designing a brand-new access solution, we provide complete gate automation services tailored to your property.

Our engineers specialise in sliding gates, swing gates, bi-folding gates, and articulated systems, offering flexible configurations to suit both residential and commercial environments.

BUILT BY SKILLED CRAFTSMEN

Unlike many installers, we bring craftsmanship in-house. Our experienced blacksmiths and fabricators create strong, beautifully finished gate systems that combine style with performance. From bespoke steel designs to precision-engineered components, every element is hand-built with care.

Automatic

Doors

We offer high-quality automatic door installation for commercial buildings, residential entrances, retail units, offices, healthcare environments, and more.

Built for Safety, Reliability, and Compliance

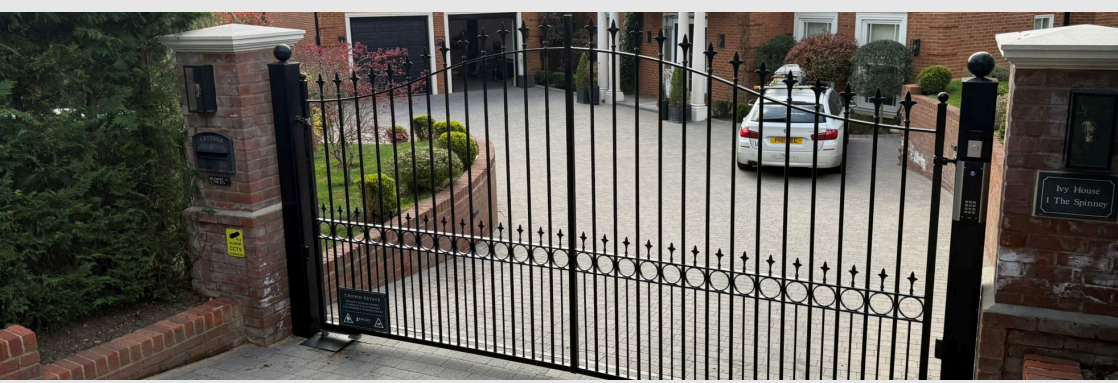

All our automatic doors are installed in accordance with the latest BS EN16005 safety standards, ensuring full compliance and peace of mind. Our engineers fit all required sensors, safety beams, emergency releases, and control systems to guarantee safe and reliable operation.

Service Plans

Regular servicing is essential to keep automatic doors safe, compliant, and operating at peak efficiency. We offer flexible service and maintenance plans to suit all types of installations. Our service plans help you:

- Maintain legal compliance
- Reduce costly repairs
- Extend the lifespan of your door systems
- Ensure ongoing safety for staff, customers, and visitors
- Keep your doors running smoothly year-round
- We provide clear service reports and performance testing.
- Fast Repairs & Emergency Call-Outs

Automatic Doors & Electric Gates Service Contracts

Full Annual Service

A comprehensive service of your automatic door or electric gate, covering mechanical, electrical, and control components. This ensures the system continues to operate efficiently and safely.

Two Safety Checks Per Year

To remain compliant with safety and insurance regulations, each system requires two safety inspections annually:

- Safety Check 1: Completed at the time of the full annual service
- Safety Check 2: Conducted six months later to ensure continued safe operation

Full Risk Assessment & Certification

Every visit includes the required risk assessment, force testing, and certification, ensuring your system meets legal and insurance obligations. This documentation is essential for maintaining compliance and protecting users.

BRONZE PACKAGE

Ideal for clients requiring compliance and maintenance.

Includes:

- Annual full service
- Bi-annual safety checks
- Risk assessment and certification

SILVER PACKAGE

A popular option for sites needing additional support.

Includes:

- Everything included in the Bronze Package
- Two free call-outs for system issues throughout the year

GOLD PACKAGE

Our most complete and cost-effective solution for heavily used or critical systems.

Includes:

- Everything in the silver package
- Unlimited call-outs
- Parts allowance to cover component replacements and keep the system operational

CCTV & SECURITY SYSTEMS

OVERVIEW

At IGS, we deliver robust, modern and reliable CCTV systems designed to protect your premises with confidence. As accredited Hikvision partners, we supply and install professional-grade surveillance technology trusted across commercial, retail and industrial environments.

Whether you're upgrading an existing system or starting from scratch, our specialist team provides complete end-to-end support—from design and installation to configuration, remote access setup and long-term maintenance.

AUTHORISED SYSTEM ACCESS & RECOVERY

Our engineers can help you:

- Recover authorised access to systems where credentials have been misplaced
- Reconfigure and modernise older CCTV setups
- Integrate legacy hardware with new platforms
- Migrate systems to remote monitoring or cloud-accessible solutions

All work is carried out in compliance with UK security and data regulations.

REMOTE MONITORING & INTERNET INTEGRATION

Gain full visibility of your site from anywhere in the world.

We offer:

- Secure internet routing of CCTV systems
- Encrypted remote monitoring via PC, smartphone or tablet
- Multi-site viewing for businesses with several locations
- Alert and notification integrations

Our team ensures your system is optimised, secure and always accessible.

EXCLUSIVE CCTV TECHNOLOGY

IGS provides exclusive, industry-leading innovations designed to enhance system reliability, security and ease of use. Our technology solutions integrate seamlessly with both new and existing installations.

PACKAGES

We offer flexible packages tailored to your needs:

- Full system installations
- Refurbishment of outdated or partially functional setups
- Preventative maintenance plans
- Rapid-response technical support
- Optional ongoing service agreements for guaranteed uptime

HIKVISION

IGS PROTECT

IGS Protect Alarm Service offers round-the-clock surveillance to any security threat. Whether it's a break-in, fire, water leak or emergency, our advanced alarm systems provide real-time alerts, ensuring you're always one step ahead. Trust us to protect what matters most, day or night.

We are a trusted partner of Ajax to ensure the continued development and superiority of the system

REMOTE MONITORING

Our remote monitoring and fault repair service ensures quick response to system issues. We diagnose and fix problems remotely or isolate faults to maintain security. If needed, faulty equipment is replaced within 72 hours.

DUAL PATHWAY ALARM SYSTEM

We ensure your system stays online with a constant 4G backup and dual SIM technology to prevent interruptions.

ANNUAL SERVICING

This service includes annual maintenance and company-approved upgrades to enhance your system. We ensure you receive the latest equipment as needed and collaborate with Ajax to maintain top-tier security performance.

24/7 PHONE SERVICE

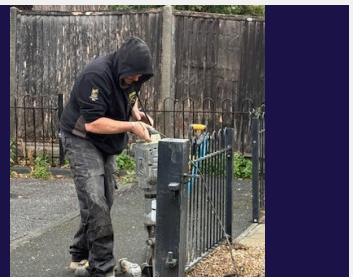

If you lose a code, phone, or fob, we can remotely disable or reset your system for you.

REAL TIME ALERTS

Protect your property with IGS Protect Alarm Service, designed to offer reliable and swift protection in the event of an intrusion or emergency. Our system sends instant alerts directly to your phone, with two factor authentication to ensure an intrusion is verified facilitating response.

COMPREHNSIVE PROTECTION

Our advanced system uses motion sensors, cameras, and smart technology to detect threats instantly, keeping you in control anywhere.

Access Control & Intercoms

OVERVIEW

We deliver reliable access control solutions using leading systems such as Paxton and Hikvision for both commercial and residential sites.

Our team specialises in the installation, maintenance, and repair of VIDEX and BELL intercom systems, including legacy and obsolete platforms. Through bespoke compatibility solutions, we can restore and upgrade older systems, integrating them with modern technology and extending their service life—often avoiding full replacement.

Practical, cost-effective access control solutions, tailored to every site.

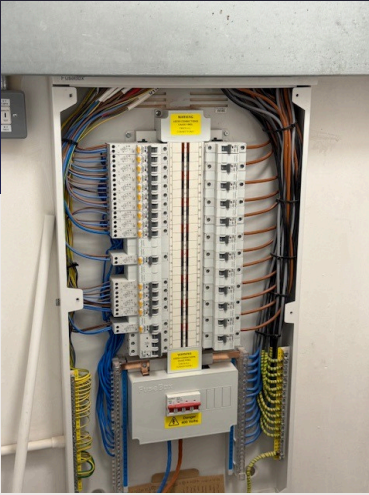

SERVICES

Our services include:

- Cellular site surveys to determine the most suitable network and tariff for each location
- Comprehensive wiring testing
- Intercom system support
- Compatibility upgrades.
- We also provide detailed quotations and full insurance coverage for complete peace of mind.

ELECTRICAL SERVICES

We provide a comprehensive range of domestic and commercial electrical services, including:

Electrical Installation Condition Reports (EICRs)

- Landlord EICRs
- Compliance and safety inspections
- EICR searches and certification

Rewires & Electrical Upgrades

- Full and partial rewires
- Consumer unit (fuse board) changes
- Electrical upgrades to current regulations

Emergency Lighting

- Emergency light testing and certification
- Emergency light refurbishment
- New emergency lighting design and installation

Access Control & Safety Systems

- Strike locks
- Over-door exit devices
- Security-minded electrical installations

New Electrical Installations

- Domestic and commercial installations
- Power, lighting, and specialist circuits

Security & External Lighting

- Floodlight installation
- Security lighting solutions
